# Simplify teaching with i3LEARNHUB.

Efficiency and ease of use are essential for teachers in today's digital education era. Educators need tools that simplify lesson planning and improve classroom interaction. i3LEARNHUB is a versatile online application accessible on any device, offering powerful features that make preparing lessons from home effortless and create and improve interaction and collaboration in the classroom.

i3FASTTRACK for quick access.

i3FASTTRACK makes logging in fast and effortless. Use the companion app on your phone to scan a code for instant access. With the "remember me" option, you stay logged in, saving time and letting you dive straight into lesson preparation.

Efficiently manage and share materials for streamlined teaching.

Materials and personal folder: easily access all your lessons and presentations through the home button. Organize them in your personal folder, open and edit them anytime.

User-friendly URL integration: easily add URLs to your presentation and use them instantly. The website remains fully interactive within the presentation, allowing you to scroll and navigate without opening additional tabs.
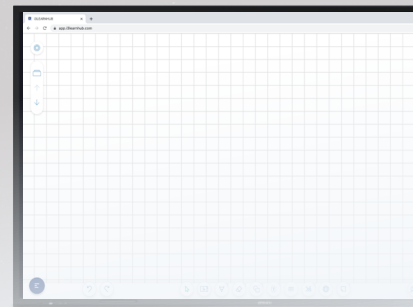

Create lesson plans from scratch: start with a template and add interactivity to your exercise with just one click.

Interactive exercises: create exercises from existing documents like word files and add interactive elements to engage students actively.

Share and scan: share materials, lesson plans with students, who can scan and access them on their own devices.

Feedback: students can return completed exercises to you with a simple arrow on their screen.

Share customized activities: use templates to create customized exercises. Share them with a QR code, so your student can scan them and do the 'games' on their student device.

Customize your workspace for convenience.

Tailor your favorite toolbar to your needs, just like a pencil case, for your most-used tools. Add frequently used features to streamline your workflow and work more efficiently. Use it as a floating toolbar to have easy access.

Collaborate interactively with i3LEARNHUB.

Quick Quiz

Instantly set up a quick quiz using a code or scan. Questions appear on the screen while students respond on their own devices, making it perfect for quick assessments.

Activity builder

Use the activity builder under the dice icon to craft interactive exercises like word searches. Templates make it easy to create engaging and dynamic activities.

Multi-user functionality

Enable multiple students to work on the board simultaneously. You can use up to four screens, each with its own whiteboard to prevent interference. This feature also supports various apps for diverse activities.
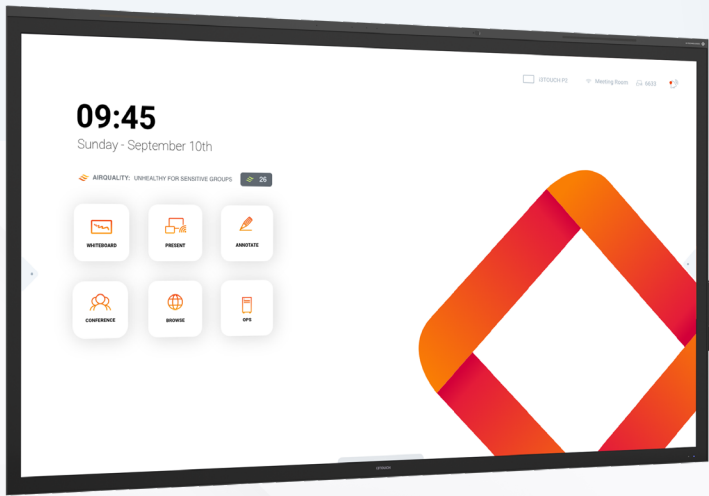

Virtual collaboration

Share your lessons as a group session, allowing students to join from home. All contributions appear immediately on your screen, facilitating real-time interaction.

About us.

A family-run business with over 50 years of history. From traditional chalkboards to whiteboards to interactive touch displays, we have evolved and innovated with our customers in mind.
