

Elevate your work with i3WHITEBOARD

Efficiency and innovation are crucial in modern education. Teachers require effective tools that streamline their workday and boost productivity. Providing educators with solutions that eliminate barriers, improve efficiency and enable them to effortlessly export their documents as PDF's, can greatly enhance the learning experience.

VR Tools for interactive learning.

Explore a range of virtual measuring tools on the i3WHITEBOARD:

Ruler for precise measurements

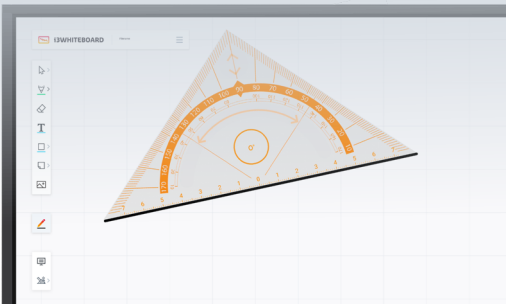

Utilize the virtual ruler for accurate measurements in lessons, ensuring precision clarity.

Compass for drawing circles and arcs

Use the virtual compass to effortlessly draw circles and arcs, improving visual aids and diagrams.

Protractor for angle measurements

Employ the virtual protractor to measure angles with ease, supporting geometry and trigonometry lessons effectively.

Pen & finger preference for versatile user modes.

Unlock versatile user modes with our pen & finger preference tool. Choose Single Mode for shared color and thickness settings between pens and finger, perfect for solo use. Switch to Basic Mode where the grey pen and finger can be assigned a tool like the marker while the other pens can be used for writing using shared color and line thickness settings. For full customization, Expert Mode offers individual color and thickness settings for each pen and finger, with the tool menu accessible only by finger. Enhance your interactive experience with tailored settings for every teaching style.

SINGLE MODE

Using this preference, the pens and finger share the same color and line thickness settings.

BASIC MODE

The grey pen and the finger can be assigned a tool like the marker while the other pens can be used for writing using shared color and line thickness settings.

EXPERT MODE

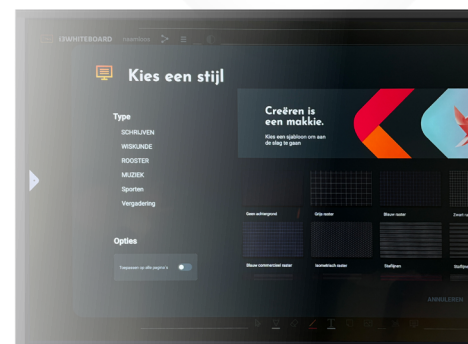

All pens, as well as finger, have their own color and line thickness settings.

The tool menu can only be used with the finger.

Customize backgrounds for structured teaching.

Choose from various backgrounds on the i3WHITEBOARD to suit different teaching needs. Opt for lined backgrounds for writing practice, which can be extended across all pages for consistency. This feature allows teachers to create structured lessons easily and provide clear guidance for students throughout the session.

Navigate smarter with i3WHITEBOARD

Blackboard option

Instead of a white screen, the i3WHITEBOARD allows you to switch to a black background, which is softer on the eyes, enhancing comfort during extended use while giving the authentic look of an original chalkboard.

Location pin

Keep track of your notes with the i3WHITEBOARD's location pin, showing where you've written on the board, making it easy to refer back to previous annotations.

Toolbar placement

For added convenience and ease of use, customize your workspace by placing the toolbar at the bottom, ensuring easy access to essential tools and enhancing workflow efficiency.

Infinite canvas

Enjoy a digital infinite canvas for unlimited writing space, allowing seamless continuation of ideas without constraints.

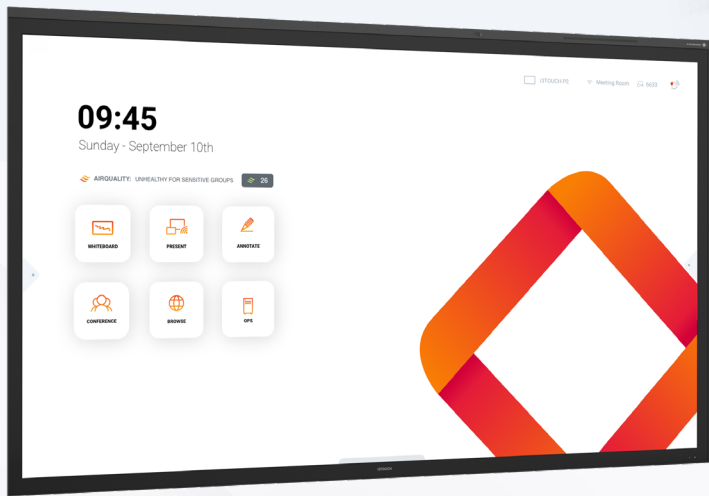

Annotate

Utilize the annotate feature to freeze images and videos and add notes, elevating interactive learning experiences with visual aids.

About us.

A family-run business with over 50 years of history. From traditional chalkboards to whiteboards to interactive touch displays, we have evolved and innovated with our customers in mind.

i3-Technologies

In 2013 it was the launch of i3-Technologies, creating and manufacturing interactive touch displays and boards with a range of accessories. We now operate through a **dedicated channel network in over 90 countries worldwide**. On our mission to make **technology simple to use, easy to integrate, and accessible to everyone**: We've come a long way, and we are just getting started.
