

Nureva® Console

Nureva Console is a secure, cloud-based platform that makes it easy to manage and monitor your Nureva products from anywhere. It's included with the purchase of any Nureva device. Additional advanced features are available with a paid Nureva Pro subscription.

Remote management

Save time and effort needed to manage your systems – without requiring additional servers. Nureva Console lets you log in from anywhere and see at a glance if devices require your attention. You can also make changes right from the platform, avoiding the need to go room to room. When firmware updates are available, it's easy to bulk install them with just one click.

Intelligent monitoring

Quickly resolve problems before they impact your spaces. Email alerts (available with Nureva Pro) and a room status dashboard mean you'll always know if new firmware is available or if any devices have been disconnected.

Informed decision making

Get the information you need to gain a deeper understanding of your rooms. Access to acoustic insights uncovers rooms that may benefit from acoustic treatment. In addition, historical usage data lets you know how and when rooms are being used so you can identify opportunities for optimization or further investment.

Customized control

The Nureva Developer Toolkit – accessed through Nureva Console – provides cloud-based APIs and support documentation. This makes it easy to incorporate Nureva systems into your existing workflows, creating seamless integrations with other products.

Features

- **A color-coded dashboard** makes it easy to see device status at a glance, including available firmware updates
- **Asset management features** let you name and tag devices and classify your rooms by device type and size
- **Device settings** enable you to configure your systems by setting up microphone pickup zones with Active Zone Control, turning on Voice Amplification Mode, choosing speaker presets and more
- **Email alerts** let you know instantly if there are issues so you can resolve them right away (available with Nureva Pro)
- **Analytics and insights** equip you with usage and acoustic performance data to identify potential improvements (up to 3 years of data available with Nureva Pro)
- **Cloud-based APIs** let you automate firmware updates or other routine tasks plus customize how and where you access device information and audio settings
- **Integrations with Extron® and Crestron®** allow users to control Nureva systems from these touchpanels

We are Nureva

We believe that amazing things happen when people come together. They imagine greater possibilities, create better solutions and find greater joy in how they work and learn. It's why we create and support truly original solutions that make it astonishingly easy for our customers to connect and collaborate no matter where they are.
